Sources of protein

- Excellent sources of protein include tuna, shrimp, turkey, and cod.
- Very good sources of protein include snapper, venison, halibut, salmon, scallops, chicken, lamb, beef, calf's liver, spinach, tofu, mustard greens, mushrooms, soybeans, and mozzarella cheese.
- Good sources of protein include eggs, milk, collard greens, cauliflower and many legumes including lentils, split peas, kidney beans, black beans, pinto beans and garbanzo beans.

Sources of Protein

Table 5

Nutritional classification of amino acids		
Essential	**Semi-essential**	**Non-essential**
Histidine	Arginine	Glutamic acid
Lysine	Tyrosine	Aspartic acid
Tryptophan	Cystine	Alanine
Phenylalanine	Glycine	Proline
Methionine	Serine	Hydroxyproline
Threonine		Cysteine
Leucine		
Isoleucine		
Valine		

Functions of protein

- Production and maintenance of structural proteins
- Production of enzymes and hormones
- Production of transport proteins and lipoproteins
- Production of antibodies
- Maintenance of proper fluid balance
- Maintenance of proper acid – base balance.

Protein deficiency diseases – Maras muss and kwashiorkor
