- ❖ vaccines should be stored at an appropriate temperature (preferably low) and the temperature should be maintained during its transport from the manufacturing site to the actual vaccination site.
- ❖ This system of storage and transport is known as the "cold chain". The World
- ❖ The Health Organization officially launched a global immunization programme, known as Expanded Programme on Immunization (EPI) in May 1974, to protect all children of the world against six vaccine –preventable diseases.
- ❖ Babies should be exclusively breastfed for the first 6 months of life to achieve optimal growth, development and health. Thereafter, infants should be given complementary foods which are nutritionally adequate and safe to meet their nutritional requirements,while continuing to breastfeed for up to two years or beyond.
- ❖ Growth is defined as an increase in size of an individual
- ❖ This increase in size is due to increase in the number and diameter of the cells. Development denotes the functional maturity of the child.
- ❖ It is the mental maturation with acquisition of skills. Growth chart is developed by Prof. David Morley.
- ❖ It is a visual display of child's growth and development. Weaning is the process by which a baby slowly gets used to eating family or adult foods and relies less and less on breast milk
- ❖ Maternal and Child Health services include the curative, preventive and social aspects of maternity services, paediatrics, family welfare, nutrition, child development and health education
