

E. Conversion Disorder

Conversion disorder formerly known as HYSTERIA, which is a loss of or change in body function resulting from a psychological conflict, the physical symptoms of which cannot be explained in terms of any known medical disorder or pathophysiological mechanism.

F. Psychosomatic Disorders

The term psychosomatic disorder is mainly used to mean a physical disease that is thought to be caused or made worse by mental factors. Eg. Chest pain may be caused by stress and not by physical disease.

The word psychosomatic is now replaced with psychophysiologic disorder. They are also called as stress related disorders. Most of the symptoms are treated in general hospital rather than in mental hospital.

G. Post-Traumatic Stress Disorder (PTSD)

Post-traumatic stress disorder is a severe anxiety disorder that can develop after exposure to any event which results in psychological trauma.

H. Generalised Anxiety Disorder (GAD)

Generalised anxiety disorder is characterized by excessive anxiety and worry about every day life events with no obvious reasons for worry. It may be about money, health, family, work or school

Personality Disorders

(Refer Applied psychology Chapter.)
