Patient Education and Health Maintenance

- Instruct patient and family about adverse physiologic and psychological effects of substance use.
- Discuss health maintenance practices to minimize potential effects of substance use (e.g., vitamin use, proper diet).
- Explain the potential for injury from risk-taking behaviours. Reinforce the need for aftercare groups and activities.

10.8 Mental Retardation

Mental handicap is more complex enterprise. Some children can go through life but others need help depending upon their disability. Institutionalization and special schooling are required for a number of mentally handicapped children.

Mental retardation has a new name "Intellectual disability" or "Intellectual Developmental Disorder or General Learning Disability".

Meaning

Retarded is derived from Latin Word

"Retardare" = which means to make slow, keep back, or hinder.

Definition of Mental Retardation:

Mental retardation is a generalized neuro developmental disorder characterized by significantly impaired intellectual and adaptive functioning" –American Association on mental deficiency (1983).

Causes for Mental Retardation

- **Genetic Causes:** Abnormal genes form parents (chromosomal abnormalities)
- **Metabolic:** Phenylketonuria, Wilson's disease and Galactosomia
- **Cranial malformations:** Microcephaly and hydrocephaly
