- Use of Mental Health technologies to improve general health services
- Application of mental health principles in total national development to improve quality of life

Objectives of National Mental Health Programme

Funtions of NMHP

Mental Hospitals

- Very chronic and disturbed patient who cannot be looked after in the community, to be certified and admitted in mental hospitals.

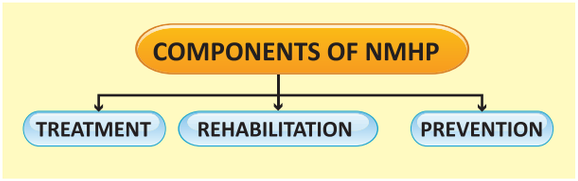

Medical Colleges

- Will take the responsibility of training of general practioners and the medical offices in the primary health centres. They will function as research centres.

District and Taluk Hospitals

- Will have the department of psychiatry and psychiatrist.
- They will supervise the medical officers and general practioners in the PHC
- Community health workers attached to PHC will identify the patients who suffer from psychiatric disorders and refereeing the patient to the PHC for treatment

Components of NMHP

District Mental Health Program (DMHP)

The District Mental Health Program (DMHP) was launched under National Mental Health Program in the year 1996. Presently the District Mental Health Program (DMHP) is being implemented in 123 districts.

THE MAIN OBJECTIVE IS: To provide community mental health services and mental health services with general health services through decentralization of treatment based on primary health care services.

Components of District Mental Health Program (DMHP)

- Training programs for all health workers in mental health team
- Public education to increase awareness
- Outpatient services and indoor services for early identification and treatment
- Providing valuable data to state for planning, implementing and research.

Prevention of Mental Illness

The concept of mental health has got great response in dealing with clients of mental disorders. Community health movement has been considered as revolution in the field of psychiatry. Caplan discussed 3 levels of prevention in "public health model" in includes:

- Primary prevention
- Secondary prevention and
- Tertiary prevention
