5. **Acute diarrheal disease** - is an acute or chronic intestinal disturbance characterized bypassing more than three loose motions in a day with in 24 hours. Oral rehydration therapy is the most important thing in maintaining the hydration level.
6. **Poliomyelitis** - is an acute viral infection caused by polioviruses. It is a crippling disease. The causative organism is three types of polioviruses (Type I, II and III) Mode of transmission is by faeco oral route and droplet infection.
7. **Food poisoning** - is an acute gastro enteritis caused by the ingestion of food or drink contaminated with either living bacteria or other toxins or chemical substances.
8. Diseases transmitted through parasites are amoebiasis, ancylostomiasis, Taenia solium and Tarmia saginata and Ascariasis.
9. Amoebiasis - is a common infection of the human gastro intestinal tract and caused byEntamoeba histolytica.
10. Hook worm infestation - is a chronic infestation of small intestine. The causative organism is Ancylostoma duodenale, Necator americanus.
11. Ascariasis - is a common helmenthic infection in man caused by Ascaris lumbricoids.
12. Tape worm infestation or Taeniansis - is a group of cestode infections which are important zoonotic disease.
13. All the diseases transmitted through oro-faeco route and the diseases caused by parasites may be controlled and prevented by proper sanitation method, improved personal hygiene and vaccines.
14. Chickenpox or varicella - an acute highly infectious disease caused by varicella – zooster. Virusit is characterized by vesicular rash, that may be accompanied by fever and malaise.
15. Swelling of the parotid glands is the first indication of mumps.
16. Influenza spread mainly from person to person by droplet infection or droplet nuclei created by sneezing coughing or talking.
17. Diphtheria spreads mainly by droplet infection. Transmission occurs by objects like cup,thermometer, toys, pencils
18. Meningococcal meningitis or cerebro spinal fever is an acute communicable disease caused by N. meningitis.
19. Acute respiratory infections may cause inflammation of the respiratory tract anywhere from nose to alveoli.
20. The word rubeola means red spots.
21. There are three main test currently used in tuberculosis, mantoux intradermal test, the head and the tiny multiple puncture test. Tuberculosis which affects animals is known as “bovine tuberculosis.”
22. Swine flu which is called pig flu caused by influenza virus.
23. Malaria is a protozoal disease caused by infection with parasite of the Genus plasmodium and transmitted to man by infected anopheline mosquito.
24. Lymphatic filariasis is caused by Wuchereria bancrofit. The lymphoedema management is washing and drying the affected limb, elevating the limb and exercising.
25. Dengue fever is otherwise called as break-bone fever.
26. Chikungunya fever caused by group A virus, the chikungunya virus and transmitted byAedes, culex and mansonia mosquitoes. The incubation period of chikungunya fever is 4-7 days.
27. Japanese encephalitis is a mosquito borne encephalitis infecting mainly animals and incidently man.
28. Tetanus is an acute neuromuscular disorder caused by clostridium tetani.Tetanus is entirely preventable disease by active immunization with tetanus toxoid.
