Practical 7

HOME NURSING

Home is always associated with comfort, security and positive feeling.

Learning Objectives

- On completion of this chapter the learner will be able to
- List out the purpose the health assessment
- Describe the technique followed during physical assessment

Introduction

A home is where you feel cared for and comfortable. Elderly persons choose to be at home than cared in the hospitals during acute and chronic illnesses. Home nursing services comprises a wide range of health care which can be handled easily at home. The services provided are based on the needs of the individual and family. Home care is planned, coordinated and made available by providers organized for the delivery of home care. Recently there has been a shift of community based care. The nurse is a valuable team member home health care service.

Definition

Home care (Domiciliary care)

1. Home care is the supportive health care provided in the home.
2. Home Care may be provided by licensed health care professionals who provide medical treatment or by professional caregivers who provide daily assistance to ensure the activities of daily living are met.

Purposes of Home health care

1. Promotion, maintenance and restoration of health
2. Minimizing the effects of illness and disability
