- **Keloid-fibrosis** on the skin in response to injury
- **Scleroderma or systemic sclerosis** - an autoimmune disease of the connective tissue that primarily affects the skin but can also involve other organs such as the kidneys, heart and lungs.

Diagnosis

- Tissue biopsy

Management

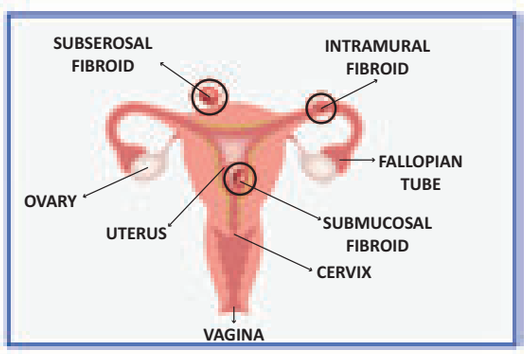

- Stem Cell therapy

Complication

- Joints - stiffness and pain
- Tendons – contracture, deformity
- Shoulder capsule - adhesive capsulitis and frozen shoulder
- Fibrosis of the soft tissue in the penis

2.23 Fibroid Uterus

Uterine fibroids are noncancerous growths of the uterus that often appear during childbearing years. It is also called leiomyomas or myomas.

Definition

The benign tumors that originate in the uterus.

Classification

- Submucosal (submucous) fibroids
- Intramural fibroids
- Subserosal fibroids

Signs and Symptoms

- Abnormal uterine bleeding
- Spotting between menses
- Iron deficiency anemia
- Mild or severe, localized pain in lower abdomen or back during / after sexual contact
- Pelvic pain, including pain during sexual contact
- Pressure on the bladder
- Obstructed urination
- Painful or difficult defecation

Diagnosis

- Pelvic exam
- Ultrasound.
- Hystero Salpingo Graphy (HSG)
- MRI, CT Scan

Management

Management in general

- Preventive
- Conservative

Medical

- Hormonal Therapy
- Low dose of oral contraceptives
- Analgesics for pain

Surgical

- Hysterectomy,
- Myomectomy
- Cryosurgery

Preventive

- Effective antenatal care
- Adequate intranatal care
- Adequate postnatal care
