Management

General Management

- Encourage to eat a healthy diet that includes plenty of whole grains, fruits, vegetables, protein and calcium.
- Exercise regularly
- Adequate sleep
- Use absorbent tampon
- Avoid caffeine.
- Eat smaller, and frequent meals
- Vitamin or mineral supplements
- Avoid alcohol,
- Avoid self medications

Medical Management

- Hormonal therapy
- Iron supplementation to prevent anaemia.

Normal menstrual cycle is 28 days + 7 days

2.25 Uterine Prolapse

Uterus (or womb) is normally held in place inside pelvis with various muscles, tissue, and ligaments. Because of pregnancy, childbirth or difficult labor and delivery, in some women these muscles weaken. Also, as a woman ages and with a natural loss of the hormone estrogen, the uterus can drop into the vaginal canal, causing the condition known as a prolapsed uterus

Definition

Descend of uterus from its normal position in the pelvis further down into the vagina.

Types

First degree: The cervix drops into the vagina.

Second degree: The cervix drops to the level just inside the opening of the vagina.

Third degree: The cervix is outside the vagina.

Fourth degree: The entire uterus is outside the vagina. This condition is also called procidentia. This is caused by weakness of the supporting muscles.

Risk factors

- Excess weight lifting
- multiple deliveries

Causes

- Pregnancy/childbirths with normal or complicated delivery through the vagina
- Advancing age with weak pelvic muscles
- Weakening and loss of tissue tone after menopause and loss of natural estrogen
- increased pressure in the abdomen such as chronic cough
- Major surgery in the pelvic area leading to loss of external support
- Smoking

Signs and Symptoms

- Pelvic heaviness or pulling
- Vaginal bleeding or an increase in vaginal discharge
- Difficulties with sexual intercourse
- Urinary leakage, retention or bladder infections
- Bowel movement difficulties, such as constipation
- Lower back pain
- Uterine protrusion from the vaginal opening
- Sensations of sitting on a ball or feeling of something is falling out of the vagina
- Weak vaginal tissue
