their behaviours, class mates or school mates and their behaviours, teaching methods and discipline all contribute towards attitude formation.

## Attitudinal changes

Attitude can be changed. It is not fixed one. They can be changed through the acquisition of new experiences. The following are the ways and means of attitudinal changes:-

- Providing proper education
- Making use of the propaganda machinery (eg, family planning, sanitation, road safety)
- Using fear inducing mechanism (eg. Rules and legal laws against dowry, child marriage, child abuses)
- Using modeling technique (eg. Imitating the behaviours of the heroes and heroines)
- Direct personal experience ( eg. Lack of exercise leading to obesity and diabetes in a person will develop favourable attitude towards exercises).
- Using cognitive dissonance mechanism (eg, In smoking, making a person to think rationally instead of criticizing his negative attitude towards smoking).
- Bringing desired changes in beliefs and values.

## Implications for Nursing

- Nurses can help patients to develop positive and desirable attitude towards the things and persons
- She can help patients and their relatives to bring about attitudinal changes.
- She can use the techniques of attitudinal change whenever and wherever applicable.

# 3.6 Emotions

Human beings are emotional beings and emotions add colour and spice to our life. Emotions are the outward expressions of the feelings. They are usually aroused by external stimuli and emotional expression is directed towards the stimuli in the environment that arouses it.

## Meaning of emotion

Emotions are agitated states of our mind and body leading us to perform some or other types of behavioural acts.

It is a subjective response that is usually accompanied by a physiological change and is associated with a change in behavior.

## Types of emotions

Emotions are categorized as positive emotions and negative emotions.

### Positive emotions

The Positive emotions are pleasant emotions like amusement, love, curiosity, joy and happiness which are helpful and essential for the development of an individual.

### Negative emotions

Negative emotions are the unpleasant emotions like fear, anger, jealousy which are harmful to the well being and development of an individual.

At the same time, too much of everything is bad. Emotions with too much intensity and frequency whether positive or negative bring harmful effects.

## Components of emotion there are three basic components:

- **Congnitive:-** Physiological and behavioural
- **Cognitive component:-** Includes the thoughts, values and expectations that help in determining the intensity and type of emotions.
- **Physiological component:-** It is also known as a arousal. This is an internal
