In his op-ed, the prime minister revealed how difficult the challenge of running the largest and the fastest vaccination campaign in the world was. He wrote,

> It has been a truly Herculean, bhagirath effort involving multiple sections of society. For any effort to attain and sustain speed and scale, trust of all stakeholders is crucial. One reason for a successful campaign was the trust that people developed in the vaccine and the process followed, despite various efforts to create mistrust and panic. There are some who only trust foreign brands. However, when it came to something as crucial as the COVID-19 vaccine, Indians unanimously trusted 'Made in India' vaccines. This is a significant paradigm shift.[12]

Various experts on prime-time news channels concurred that it was only because of the pro-science approach that the prime minister had adopted from the beginning of the pandemic on various issues such as mask usage, lockdown, reopening the economy, oxygen supply and distribution that when it came to vaccines, Indians immediately trusted his word and chose to take the shots without blinking, despite the Opposition's efforts to shake their credibility.

In his piece, he also persuades one to think what if India had not developed its own vaccines. He writes,

> How would India have secured enough vaccines for such a large population? How many years would that have taken? It is here that credit should be given to Indian scientists and entrepreneurs for rising to the occasion. It is due to their talent and hard work that India is truly atmanirbhar when it comes to vaccines. Our vaccine manufacturers, by scaling up to meet the demands of such a large population, have shown that they are second to none. GoI has been an accelerator and enabler of progress. It partnered with vaccine-makers right from day one, and gave them support in the form of institutional assistance, scientific research, funding, as well as accelerated regulatory processes. All ministries came together to facilitate and remove any bottlenecks as a result of the 'whole of government' approach. In a country of the scale of India, it is not enough to just produce. Focus has to be on last-mile delivery and seamless logistics. To understand the challenges involved, imagine
