Despite being a foreigner, the Egyptians regarded Alexander of Macedon as their savior because he took control of the country without any significant bloodshed. He founded the city of Alexandria and then carried on with his conquest of Asia. In 323 BCE, Alexander the Great died, leaving his widespread empire to be divided between his four generals. Ptolemy was one of the generals who transported Alexander's body back to Alexandria. He established the last Egyptian dynasty that is also known as the Ptolemaic Dynasty. Queen Cleopatra VII was the last of his dynasty and is famous for marrying Julius Caesar and then Mark Anthony. After her death, Egypt became part of the Roman Empire until the fall of the Byzantine Empire when it was conquered by the Muslims from Arabia.
