the government, to leave for Ceylon to work as coolies in coffee and tea plantations under the indentured labour system. The abolition of slavery in British India in 1843 also facilitated the processes of emigration to Empire colonies. In 1837 the number of immigrant Tamil labourers employed in Ceylon coffee estate was estimated at 10,000. The industry developed rapidly and so did the demand for Tamil labour. In 1846 its presence was estimated at 80,000 and in 1855 at 128,000 persons. In 1877, the famine year, there were nearly 380,000 Tamil labourers in Ceylon.

Indentured labour

Besides Ceylon, many Indians opted to emigrate as indentured labour to other British colonies such as Mauritius, Straits Settlements, Caribbean islands, Trinidad, Fiji and South Africa. In 1843 it was officially reported that 30,218 male and 4,307 females had entered Mauritius as indentured labourers. By the end of the century some 5,00,000 labourers had moved from India to Mauritius.

Indentured Labour: Under this penal contract system (indenture), labourers were hired for a period of five years and they could return to their homeland with passage paid at the end. Many impoverished peasants and weavers went hoping to earn some money. It turned out to be as worse than slave labour. The colonial state allowed agents (*kanganis*) to trick or kidnap indigent landless labourers. The labourers suffered terribly on the long sea voyages and many died on the way. The percentage of deaths of indentured labour during 1856-57, in a ship bound for Trinidad from Kolkata is as follows: 12.3% of all males, 18.5% of the females, 28% of the boys 36% of the girls and 55% of the infants perished.

1.2 Western Education and its Impact

(a) Education in Pre-British India

Education in pre-colonial India was characterised by segmentation along religious and caste lines. Among the Hindus, Brahmins had the exclusive privilege to acquire higher religious and philosophical knowledge. They monopolised the education system and occupied positions in the society, primarily as priests and teachers. They studied in special seminaries such as *Vidyalayas* and *Chatuspathis*. The medium of instruction was Sanskrit, which was considered as the sacred language. Technical knowledge – especially in relation to architecture, metallurgy, etc. – was passed hereditarily. This came in the way of innovation. Another shortcoming of this system was that it barred women, lower castes and other under-privileged people from accessing education. The emphasis on rote learning was another impediment to innovation.

(b) Contribution of Colonial State: Macaulay System of Education

The colonial government aided the spread of modern education in India for a different reason than educating and empowering the Indians. To administer a large colony like India, the British needed a large number of personnel to work for them. It was impossible for the British to import the educated lot, needed in such large numbers, from Britain. With this aim, the English Education Act was passed by the Council of India in 1835. T.B. Macaulay drafted this system of education introduced in India. Consequently, the colonial administration started schools, colleges and universities, imparting English and modern education, in India. Universities were established in Bombay, Madras and Calcutta in 1857. The colonial government expected this section of educated Indians to be loyal to the British and act as the pillars of the British Raj.
