Chapter 15

More Testing and Troubleshooting

In the last chapter, we focused on end-to-end testing with Cypress. We installed Cypress, wrote our first test with Cypress, and became familiar with the commands. In this chapter, we'll apply Cypress testing to the rest of our Hotwire and React pages and look at some ways to get more information in Cypress and in a browser. We're also going to look at ways to troubleshoot tests and code in the browser.
