Remove Favorite buttons will work as expected. Note that it might be helpful to add the pattern `"./app/views/**/*.turbostream.erb"` to the Tailwind config file's `content` list, on the chance that we start using CSS classes in a turbo stream file:

chapter_02/04/tailwind.config.js

```
module.exports = {
  content: [
    "./app/views/**/*.html.erb",
    "./app/views/**/*.turbostream.erb",
    "./app/helpers/**/*.rb",
    "./app/javascript/**/*.js",
    "./config/initializers/simple_form_tailwind.rb",
  ],
}
```

Again, we have written zero lines of JavaScript and made only minor changes to our server-side Ruby.
