Opening and Closing Files 179
Reading and Writing Files 180
Talking to Networks 185
What's Next 186

12. Threads, Fibers, and Ractors 187
Multithreading with Threads 188
Running Multiple External Processes 196
Creating Fibers 199
Understanding Ractors 202
What's Next 206

13. Testing Ruby Code 207
Why Unit Test? 207
Testing With Minitest 208
Structuring Tests 212
Creating Mock Objects in Minitest 215
Organizing and Running Tests 217
Testing with RSpec 219
What's Next 228

Part II — Ruby in Its Setting

14. Ruby from the Command Line 231
Calling the Ruby Command 231
Ruby Command-Line Options 233
Making Your Code an Executable Program 237
Processing Command-Line Arguments to Your Code 238
Accessing Environment Variables 242
Where Ruby Finds Its Libraries 244
Using the Rake Build Tool 245
The Build Environment 249
What's Next 249

15. Ruby Gems 251
Installing and Managing Gems 251
Using Bundler to Manage Groups of Gems 253
Writing and Packaging Your Own Code Into Gems 261
Organizing Your Source Code 265
Distributing and Installing Your Code 272
What's Next 275

16. Interactive Ruby 277
Using irb 278
Navigating irb 280
Configuring irb 283
What's Next 289
