iv) Steeping

Water is heated just before it reaches the boiling point, medium ground coffee powder is added. Steeping time is nearly 6-8 minutes. Then the coffee is passed through the strainer. During steeping the coffee part should be lightly covered to prevent losses of flavouring substances.

4.2.3 Tea

Plate 4.35 **Tea**

Tea is the most universally preferred beverage. Tea has been cultivated and consumed for more than 2000 years in China and South–East Asia. The main tea producing areas are India, China, Sri Lanka, Japan and Taiwan. In India, tea is cultivated mainly in Assam, West Bengal, Kerala, Tamil Nadu and Karnataka.

High quality tea comes from the bud and the first two leaves of the growing shoot. The quality of tea is mainly influenced by the condition of soil, altitude, climate, age of the leaves, season of plucking leaves and the processing methods adopted.

i) Types of Processed Tea

Different types of tea available in the market are green, black and oolong. Various steps involved in the processing of tea are withering, rolling, fermentation, drying, grading and packaging. The market forms of tea are tea leaves, tea dust or powder, instant tea, flavoured tea and tea bags.
