omitted. In the first step of processing, leaves are steamed to protect the leaves from changing the colour and to inactivate the enzymes. Steaming is then followed by rolling and drying. The leaves retain more original green colour when the leaves are tender. The older leaves have a blackish gray colour.

■ Oolong Tea

Oolong tea is partially fermented tea primarily manufactured in China and Taiwan. The fermentation period is too short to change the colour of the leaf completely and has some characteristic colour of both green and black.

Plate 4.37 **Oolong Tea**

■ Black Tea

Black tea is enzymatically fermented tea prepared by withering the plucked leaves to soften them, passing the withered leaves, under rollers to rupture cell walls and release the enzymes, fermenting the rolled leaves by exposing them to air at 27°C for 2-5 hours to bring about the desired colour and flavour changes.
