the raw material for ice sculpturing. These sculptures are, mainly used for decorative purpose and they are provided purely realistic effect to one event. The life time of ice sculpture is very little and last for few minutes or 6-8 hours or maximum of two days so they are commonly used in special events associated with extravagant celebrations. These are very sensitive to atmospheric temperature as well as the instrumental heat which possibly used in events including light settings.

i) Uses of Ice carving

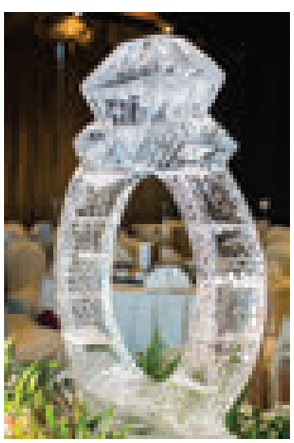

Plate 4.55 **Ice Sculpture**

- The beautiful ice sculptures like any food forms like fish or fruits ice swan or horse are used in large hotels and are used in restaurants to enhance some special events and celebrations.
- Favorite subjects for ice sculptures at weddings are board which named the couples, hearts, doves, and swans.
- There are many bars and parlors which are made up of ices and are decorated with LED bulbs.
- Ice sculptures with the high surface area are used to cool people during heat flourish events instead of air conditioner.

ii) How to Create Ice-Sculpture

Raw materials

- **Cutting**

Crystal clear, uncontaminated ice made from distilled water or double boiled water is needed. Consign a rubber mat under the ice. The specially prepared picture model is used to mount that design on the ice. Place the model on the ice block and sketch the design on it by using permanent marker or needle.

The carver must wear gloves to protect the skin from chilling. Thermal gloves with rubber top are mostly advised because it provides easiness of hand moving too to the work.

- **Refining**

Start the refine process by using bigger chisel first and then come to the small one according to the sharpness of the sculpture. To sharpen the hard ice, initially light pressure is applied and gradually increases the pressure to sculpture the ice.
