Method:

A suitable work place

To create a magnificent carving the temperature of the room should be kept at 32°F otherwise the butter will melt.

Selection of a subject

The subject for carving should be wisely chosen to depict the beauty of nature.

Dip the butter

To obtain a smooth and a finish texture, the butter should be dipped in cold water so that the impurities are removed and can obtain a perfect creation.

Construct the frame

Before carving the frame has to be created so that the base is set for carving, initially bamboo were used, now frames are made out of wood and metal.

Hands to be dipped in ice water

The hands should be numb, in order to do so it should be dipped in chilled water to prevent the butter from melting during working due to the body temperature.

Knead the butter dough

Knead soft and smooth butter dough it should not contain air bubbles, as the final product will not have a finished appearance. Colouring matter or pigments can be added to enhance the appearance of carving.

Apply butter at the base

Apply butter at the base, before starting the carving as it would act as a strong foundation. The hands also should be numb and dipped in chilled water to make the work easier.

Intricate design

Intricate the design with tallow tools. Use a sculpting knife for even texture, outlining circumferences and intricate finish.
