

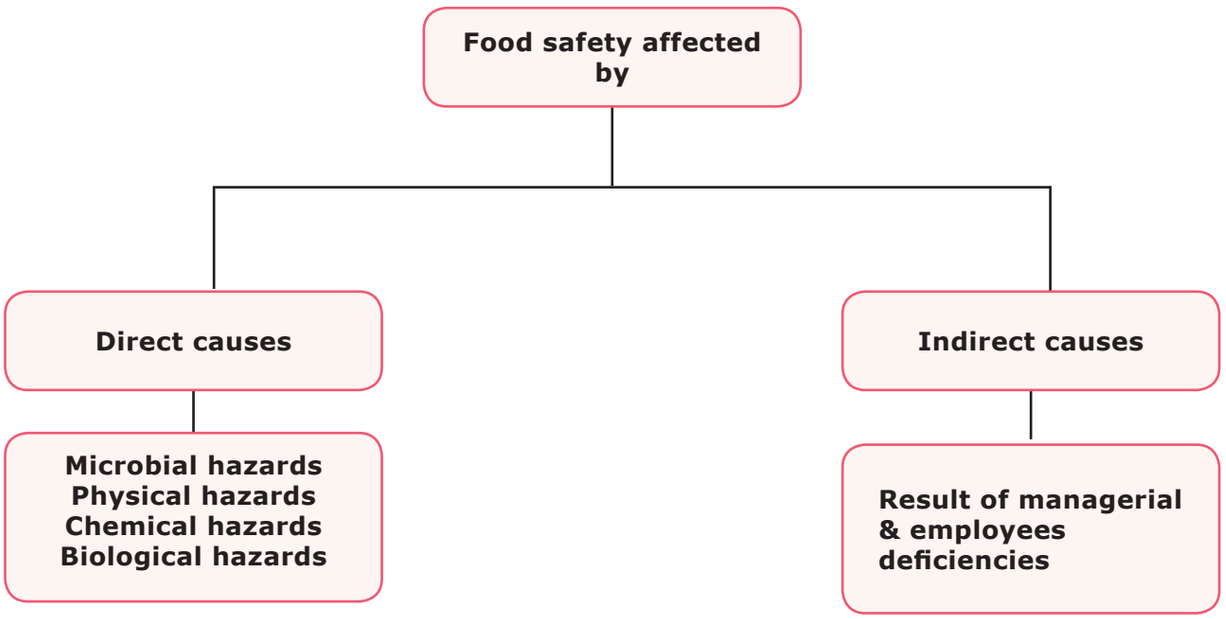

Figure 5.1 Factors Affecting Safety of Food

- Excess purchase of raw materials.
- Usage of ingredients after its expiry.

3. **Equipment, Maintenance and operations:**

- Improper working condition of the equipments.
- Improper maintenance of the equipment.
- Improper training given to the employees on the operation procedures.

Chemical hazards

- Pesticides /additives and fertilizers
- Store cleaning agents separately
- Do not practice cleaning and pest control activities in the presence of exposed foods
- Use of chemicals as per the manufacturer's instruction

Biological hazards

- The place where the foods are placed must be cleaned properly
- Elimination of the source of contamination is fundamental to the prevention and control of the biological hazards
- Gloves must be used as they protect the bends from containing blood, dropouts, body fluids and can avoid infection when touching the eyes, mouth or nose afterwards
- Gloves can also protect open wounds from contamination
- Sterilization process can be used to even eliminate microorganisms including the spores in bacteria
- Primary method for avoiding infection is to wash hands by using liquid soaps
- Wash bends before and after waste
