DO YOU KNOW?

How to display the FSSAI logo and licence on the label

The FSSAI logo and the license number of the brand owner shall be displayed on the label of a food package in the colour that is in contrast to the background.

The height of the letters and the numeral of license number shall be as prescribed as per Food Safety and Standards (Packaging & Labelling) regulation, 2011.

Central Licensing Authority

Designated Officer appointed by the Chief Executive Officer of the FSSAI in his capacity of Food Safety Commissioner.

Thus FSSAI plays a very crucial role and has the major responsibility for protecting and promoting public health through the regulation and supervision of food safety.

5.4 HACCP

Hazard Analysis Critical Control Point (HACCP)

Hygiene and sanitation of food at all levels is an important and compulsory process that needs serious and constant consideration. Food handling practices, personal hygiene and clean premises are to be maintained and clean procedures to be followed by the staff.

In 1971, Hazard Analysis Critical Control Point (HACCP) took form at the National conference of Food Production, where risk assessment was combined with the critical point concept. The United Nations Codex Alimentarius Commission Food Hygiene standard approved HACCP as an internationally accepted method for ensuring food safety by identifying hazards and monitoring the Critical Control Points (CCP) in the process.
