HACCP and the quality management system together form an organization's Total Quality Management system.

HACCP can be adopted by all sections of the food industry. A simplified version of HACCP has also been introduced called Assured Safe Catering.

Assured Safe Catering

Assured Safe Catering (ASC) is based on the HACCP approach but tends to look at the many steps or individual processes involved in getting all the supplies from the supplier to the customer. At each point where a risk is identified, a control measure needs to be designed, implemented and monitored.

Examples of Critical Control Points

- Inspection (including temperature checks) of goods on delivery and before use.
- Check for fresh and quality goods while receiving and delivery. Reject goods if spoilage is identified.
- Separate storage and holding of ingredients and finished products.
- Separate freezers should be provided for raw and cooked foods.
- Correct temperature ranges for refrigerated and frozen foods. Maintain refrigerator temperature between 34°F and 40°F. The freezer temperature should be -10 to -20°F.
- Prevent cross contamination with other menu items-Use gloves, tongs and different ladles while serving food.
- Personal hygiene and health standard-The food service personnel should be free from infections while preparing and serving.
- Proficiency in use and cleaning of equipment-Separate sinks and cutting boards should be used for vegetables and meat.

Everyone responsible for Food Safety

- Government - Food Legislation & Enforcement
  - Guidelines for Industry/ Trade
  - Information Gathering and Research
  - Provision for Health related services
  - Consumer Education

Industry - Follow GMP-GHP requirements
- Quality Assurance
- Trained Managers and Food Handlers
- Appropriate Process and Technology
- Informative labelling

Consumer - Educated & Knowledgeable
- Active Consumer Groups & community participation

Academia - Introducing HACCP in the curriculum

GMP – Good Manufacturing Practices

GHP – Good Hygienic Practices
