

Plate 6.5 Time Management

Due to peaks and troughs of activity in food service operations, a lot of valuable resources get wasted, at different points of production and service cycle. Hence analyzing each employees work and their utilization of time becomes essential.

Factors for poor management of time in kitchens and service areas are:

- Reaching late to work spot.
- Absence of production plans in advance.
- Failure of requisition of ingredients in time to start the work.
- Improper maintenance of equipment and work centers.
- Laziness, fear towards superiors, excessive supervision, and ignorance.
- Family problems or medical or social or psychological problem.

Constructive, planned action, proper management style, focused attention and maintenance of adequate records have to be set in the food service establishments to effectively manage and save the time

6.2.2 Money Management

The main aim to food service establishments is to make profits. To achieve that, money has to be invested and spent in order to acquire the other resources necessary for the production and service of food. Money flow in the establishment will occur when food is available for the customers. Following ways will ensure good investment decisions of money for food service establishment.

- Area of the space should be adequate in order to cope with the expected number of customers and the range of services to be offered both for short and long term.
- Ergonomic suitability design of equipment, furniture, structure, surfaces, fittings for use by staff and customers.
- Control of operating and maintenance costs.
- Flexibility, durability and continuity and safety of areas, equipment and materials.

Moreover a constant review or evaluation on money spent is necessary to ensure success of catering operations.

6.2.3 Energy Management

The important energy resources in food service establishments are fuel sources and human efforts. With prevailing high prices, shortages and non-availability these resources, people had never thought of conserving until recently.

The fuel energy is wasted in food service establishment, especially in kitchen. E.g.: the ways of fuel energy wasted are listed:

- Keeping switches on much before it is required especially on ovens, stoves or grills.
