6 Management Of Resources

6.1 Analyse Methods of Conserving Time, Money and Energy

Aim:

To analyse methods of conserving time, money and energy.

Equipment Needed:

Kitchen equipment.

Procedure:

Labour saving devices help to save energy, time and money. Commercial and non-commercial food service outlets use labour saving devices to save energy, time and money. Some of the equipment are pressure cookers, chappathi maker, grinder, mixers, egg beater, vegetable cutter and so on.

Chappthi maker: The dough is prepared in the dough maker and it is transferred into the chappathi maker. It portions out the dough, rolls out and prepares the chappathis in hundreds in a short time. Here time, energy and money are saved by the food service outlet.

Energy: The process of portioning, rolling and preparing is completed without using the energy of manpower.

Time: The time taken for all these processes is minimum compared to manual process.

Money: Number of labours is less and fuel is saved. Hence money used for all this is also saved.

Note: Students can use any one labour saving device and prepare a recipe. They should mention how they have saved energy, time and money using the labour saving devices (E.g: Labour saving devices: Vegetable cutter, Egg beater, mixie, grinder, pressure cooker and any other available labour saving devices).

Labour saving equipment - Pressure Cooker & Vegetable Cutter

Preparation of vegetable biriyani

- Divide the class into two groups
- First group can use knife for cutting and boiling method for preparation.
- Second group can use vegetable cutter and pressure cooker for preparation.
