4 Cakes, Beverages and Salads

QNUUNS

Learning Objectives

- Gain knowledge about the functions of ingredients, principles involved in cake preparation, types of cake and quality of cake
- Identify the different types of beverages and their preparation
- Know the importance and health benefits of different types of salads
- Develop skills in carving vegetables, fruits, butter and ice.

4.1 Cake Making – Types, Procedure

Cake is the most common and important bakery product. This is served as snacks as well as dessert too. It is developed by modification of the ingredients used for the bread. Many varieties of cakes are available in the market. Cake can be made in simpler form or in rich form by including icings or chocolate decorations. Cake is also served as a celebratory dish on ceremonial occasions, such as weddings, anniversaries, and birthdays. A good baker can prepare attractive and tasteful cakes based on the occasion and the customer's need.

Plate 4.1 Cake

4.1.1 Types of cake

There are different varieties of recipes developed globally. The main ingredients like maida, sugar, eggs, butter and leavening agent like baking powder remain the same whatever may be the variety of cake. The flavouring agents in cake preparations are vanilla essence, cocoa, nuts like badam, chestnut, dry fruits like raisins, fig and pulp of fresh or canned fruits. Pastry cream, butter cream, or other icings are used to decorate cake.

There are different types of cake. For example, plain cake, fruit cake, sponge cakes and cream cake. All these types of cake come under two basic categories namely, cream and sponge cake.
