the ingredients. However, regardless of the type of cake it should have good keeping quality. It should stay fresh or in a moist condition for longer time.

4.1.6 Sponge Cakes

Plate 4.18 **Sponge Cake**

The term sponge cake denotes a light well aerated cake with small even size air bubbles throughout the cake. This cake is made out of eggs, sugar, flour and butter or fat. During beating the eggs with sugar, the small air cells are incorporated and they give volume and softness. This character can be adjusted by making small adjustment in the formula.

Examples of sponge cakes are fatless sponge, Genoise sponge, butter sponge and gel sponge.

4.2 Beverages-Coffee, Tea, Fruit Juice

Beverages are prepared with or without little cooking. Beverages are mainly used as drink for the purpose of relieving thirst, fulfilling fluid requirement, nourishing, refreshing the body and mind and also for stimulating or soothing the individual. Water is the base for the preparation of beverages. Boiling water is the healthy method to kill all micro-organisms which are harmful to health and also to remove hardness of water. There is much commercially purified water which is available to satisfy an individual requirement. Beverages are of different varieties. They are hot drinks (coffee, tea, chocolate drink, milk, and malted cereals health drinks), alcoholic drinks (wine, beer, liquors) cold drinks (fruit juice, butter milk, tender coconut and lassi) and carbonated drinks (Fresh lime soda).

4.2.1 Classification

Beverages can be classified on the basis of their functions in the human body. Some beverages may have more than one function.

a) **Refreshing beverages:** They are served in hot weather to relieve from the thirst and to warm up or cool down the body temperature **(Eg: Tender coconut water, butter milk, fruit juice)**
