

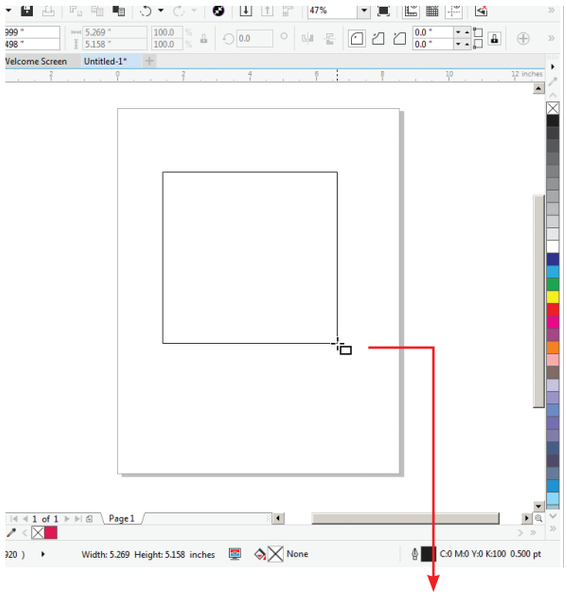

Fig.3.15 Drawing a Rectangle

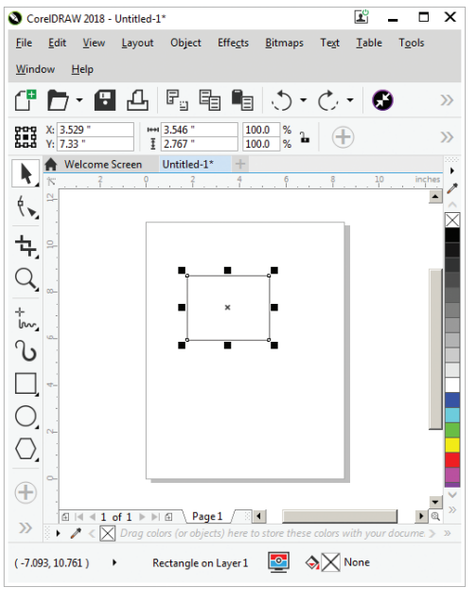

Fig.3.16 Rectangle

As you click and drag using the cursor, you'll also notice that the Status bar and Property bar show coordinates, width, and height properties detailing your new object's shape.

Drawing a Square

1. To draw a square, select the Rectangle tool in the toolbox. The mouse pointer changes to a crosshair with a small rectangle beneath it.
2. Click on anywhere in the drawing area and hold down the **Ctrl** key while dragging the mouse pointer.
3. Release the mouse button where you like the end of the square.

Creating a Rounded Rectangle

After drawing a rectangle, you can optionally round its corners. You can round all corners at once or choose the ones you want to round. Corners can be slightly rounded to create a softening effect or very rounded, almost changing the rectangle into a circle.

To round the corners of a rectangle:

1. In the toolbox, select the **Shape Tool** icon from the Shape Tool layout or press **F10** key.
2. Select the rectangle you wish to round. Four black nodes appear around the rectangle.
3. To set the same rounding for all corners make sure that all nodes are selected (black) and then drag any node. See Figures 3.18(a)-3.18(c)
