when you use the **Undo** command with vector objects

- Bitmap effects — specifies the number of actions that can be reversed when you work with bitmap effects

  The value that you specify is limited only by your computer's memory resources. The higher the value you specify, the greater the demand on memory resources.

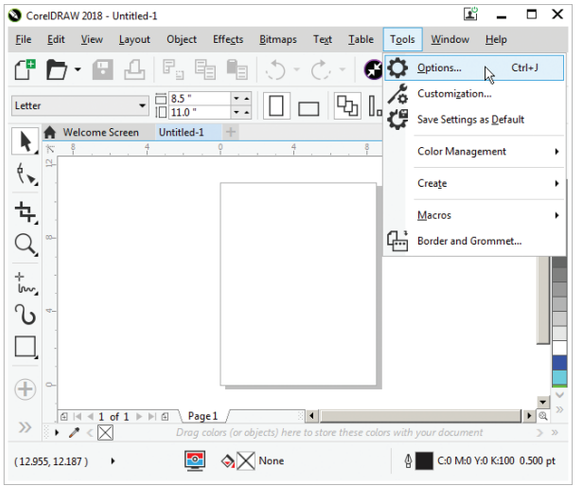

Fig. 3.41 **Options in the Tools Menu**

Shortcuts

To Undo an action, press Ctrl + Z.

To Redo an action Ctrl + Shift + Z.

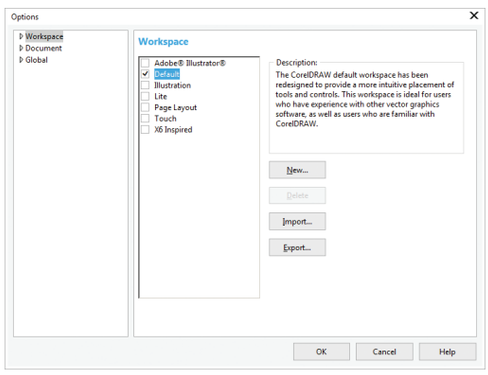

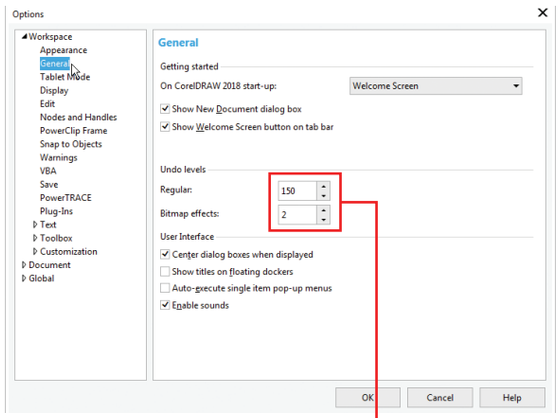

Fig. 3.42 **Options dialog box**

Specify the number of Undo levels here.

Fig. 3.43 **Specifying the number of Undo levels**

Actions you cannot undo are :

- Change of view (zooming, scrolling, etc.)
- File operation (open, saving, importing, etc.)
- Object selection operation

The **Undo** command changes depending on the last action - for example, "Undo Fill" or "Undo Rotate". If the action cannot be undone, or there are no actions to be undone, the command is grayed.

Immediately after using Undo, the **Redo** command becomes available, allowing you to restore what you just undid.

7. Saving a Drawing

To save a drawing

1. Choose **File** > **Save** in the menu bar.
2. **Save Drawing** dialog appears.
3. In the Save Drawing dialog box,

- Type a filename in the **File name** list box.
- Locate the folder where you want to save the file.
