Selecting multiple objects

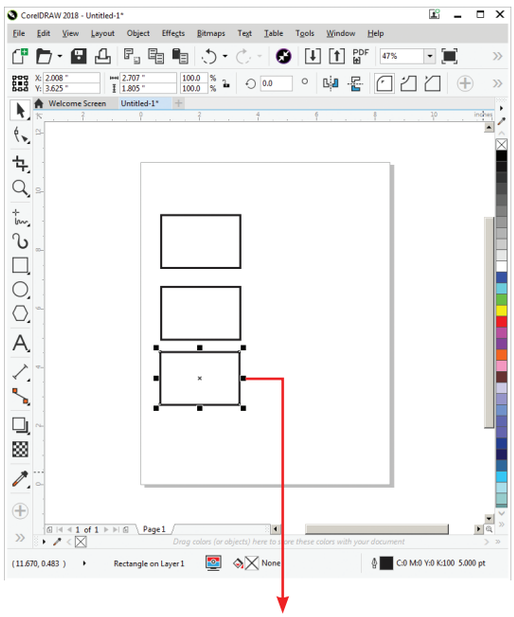

With the Pick tool, you can select more objects at a time. You can select multiple objects with the Pick tool in two ways:

1. Hold down the **Shift key**, and click on each object that you want to select.

   You can select as many objects as you have in your Drawing window in this way.

   You can even deselect objects that have been selected by holding down the **Shift Key** and clicking on them.

2. You can also select more objects than one at a time by using the Pick tool to draw a marquee (rectangle) around the objects. Only those objects that are completely encompassed by the marquee that you draw with the Pick tool will be selected.

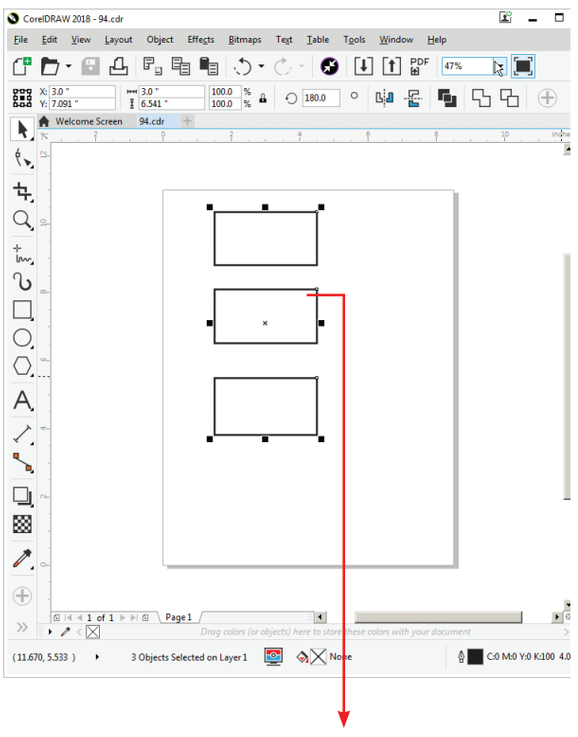

Six black square handles appear around the selected object
