12. PAGE SETUP

Each document page has its own set of page properties. Default document size will be single, letter-sized, and portrait-oriented page. If you want to change the default size of the document, you will change any of these properties.

12.1 Changing Page Size

The very simple way to define your page size is to click on a blank part of the Drawing area. When you do so, the Page Layout Property bar becomes active. You can use this Property bar to define the size and orientation of your page, as well as many other attributes.

To change the Page Size

1. Click anywhere on the drawing area except the object.
2. Click on the down arrow on the Page Size list box on the Property Bar. A drop down list of several page sizes will appear.
3. Click on the page size which you like to apply to your document. The page size you have chosen will be applied to your document.

Using the Page dimensions spin boxes

You can also define custom page sizes using the Page dimensions spin boxes in the Property bar.

1. Click anywhere on the drawing area except the object.
2. Type the width and the height that you like to have for your document in the Page dimensions spin boxes.
3. The page size for the drawing will be set according to the width and height you specified.
