To select just an outline, click the outline with the Selection tool.

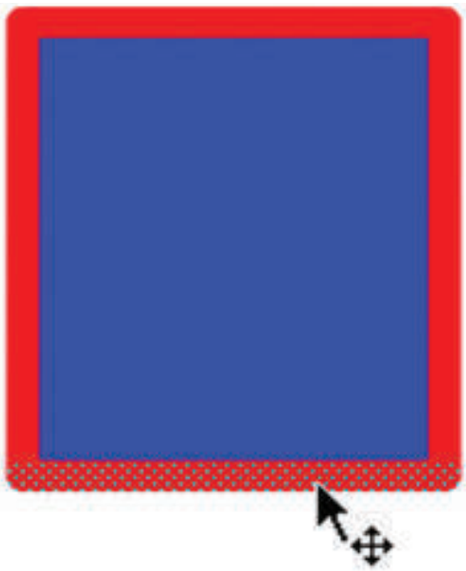

Figure 5.28 Selecting just an outline

If the outline is made up of several objects, double-click it to select the entire outline.

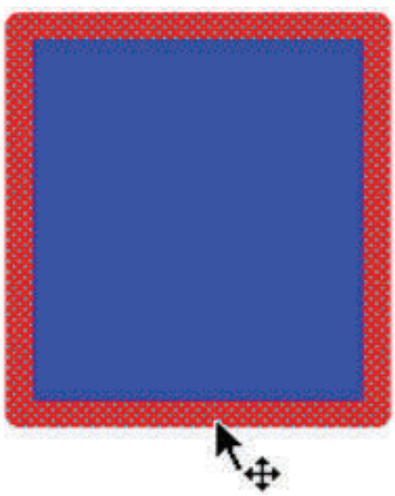

Figure 5.29

To select several unconnected objects, select one object, then press and hold the **Shift** key, and select additional objects. When you press **Shift** key, you can add to already selected objects and select as many objects as you want.

To deselect all selected objects, click any blank area. If you selected several objects and want to deselect one object, press **Shift** and click that object.

5.11.2 Selecting with Lasso tool

(1) Freehand selection

The Lasso tool is used for selecting objects by drawing a freehand selection area. To use the Lasso Tool follow these steps.

1. Click the Lass Tool on the Tools panel.
2. To lasso freehand, make sure that the Polygon Mode modifier (in the Options section of the Tools panel) is not selected.
3. Click anywhere on the Stage and drag around the objects that you want to select. Flash creates a selection area while you drag. Release the mouse button close to where you started it to close the lasso's loop.

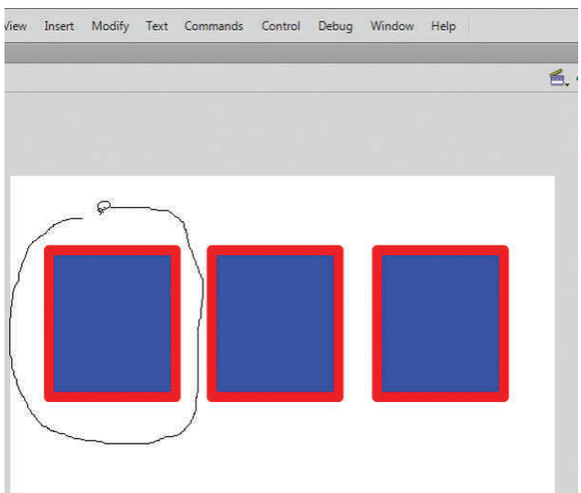

Figure 5.30 Freehand selection

(2) Point-to-point selection

The Lasso Tool can also be used to create point-to-point selection of objects. To create such selection, follow these steps.

1. Click the Lasso Tool on the toolbox.
2. Click the Polygon Mode modifier from the Options area.
3. Click on the stage at a point from where you want to start the selection.
