

Figure 5.41 The Test Movie Window

9. Close the Test Movie window.

POINTSTOREMEMBER

- Adobe Flash Professional CS6 is a software used to create animations. It contains tools that can be used to draw basic objects and to create scenes. It is developed by Adobe systems.
- The white rectangle area in the middle of your workspace is called the **Stage**.
- The timeline is one of the most important components of Flash. It is located below the Stage. It is used to specify of each element's appearance and animation.
- The Property Inspector appears on the right side of your Flash workspace by default. It is grouped with the Library panel.
- With Flash, you can integrate text, images, video, and sound to your projects, and create animations and application interfaces. Any content you generate with Flash is called an application.
