

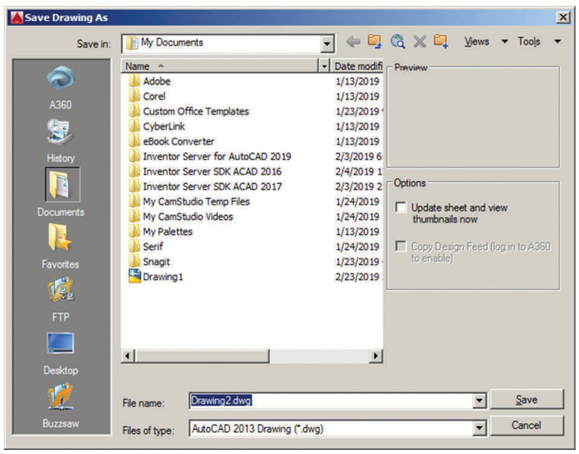

Fig. 6.82. **Save Drawing As Dialog box**

AutoCAD 2016 - File types

All saved drawings are called files. AutoCAD 2016 supports different file formats, including:

.dwg: AutoCAD 2016 drawing

.dws: AutoCAD 2016 Drawing Standard

.dwt: AutoCAD 2016 Template Drawing template file.

AutoCAD 2016 drawings can be saved in other formats as well as in pre-AutoCAD 2016 formats.

6.11 Closing Drawing Files

You can close the current drawing file without actually quitting AutoCAD by choosing **Close>Current Drawing** from the **Application Menu** or by entering **CLOSE** at the Command prompt.

To close the current opened file or all opened files,

- Click on the Application button. Now Application menu appears.
- Move the mouse to the **Close** button, then select either **Current Drawing** to close the current file, or **All Drawings** to close all the opened files in single command.

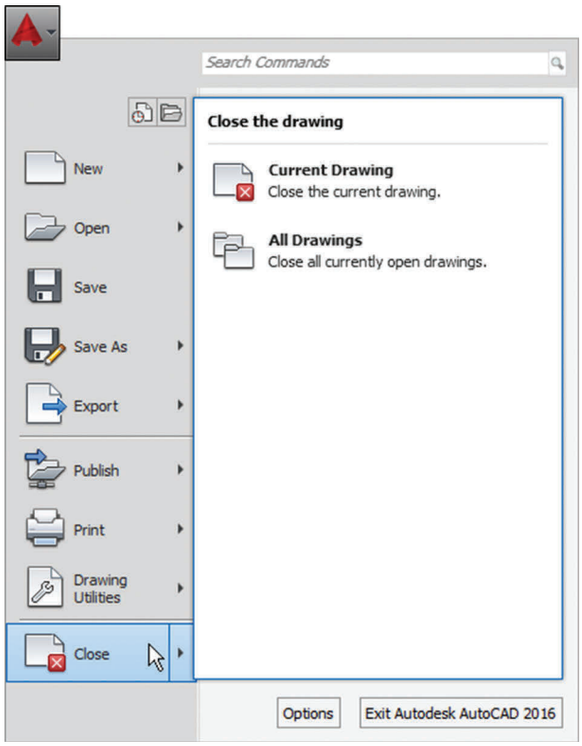

Fig. 6.83. **Close Button**

If any of the open files are modified, AutoCAD will ask if you want to save or close without saving, as in the following dialog box.

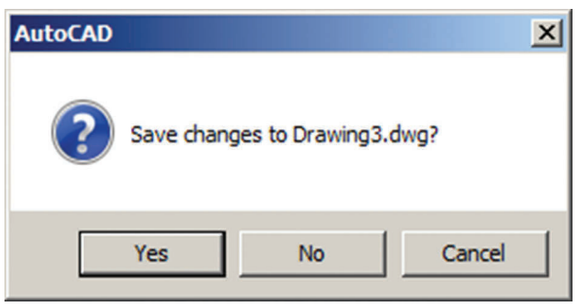

Fig. 6.84.

6.12 Exiting AUTOCAD

To save your work and exit AutoCAD:

1. Click the X button found in the upper right corner of the AutoCAD window.
