

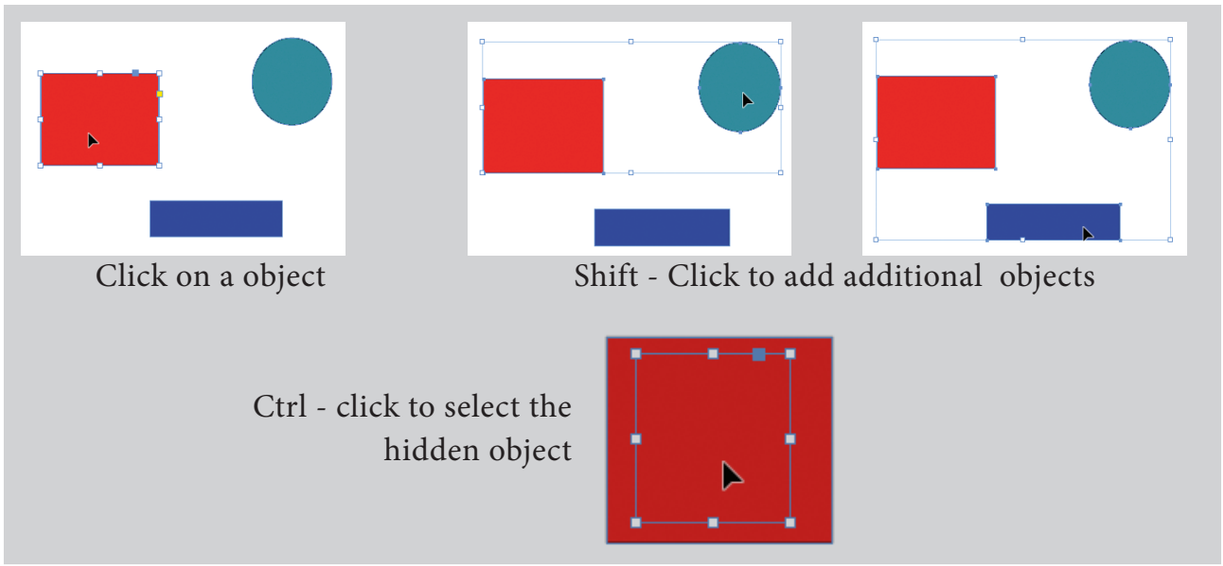

Figure 2. 14

Ctrl-clicking allows you to select objects hidden under other objects, which is an invaluable technique when you're working with crowded layouts.

Direct Selection Tool ( )

The Direct Selection tool(press A) is used to select single object out of a group (several individual objects grouped together with the Object, Group command) or to select one or more points on a path of a single object.

Page Tool ( )

The Page tool is used for creating different page sizes within a document. To create a different page size, press **Shift+P** to select the Page tool, and click the page in the layout to select it. Then use the options in the Control page to change the page layout.
