3. Select the Type tool on the Tools panel.

   Click in the frame, and then type some text. The text automatically wraps to the shape of the text frame. Press **Enter** key if you want to start a new line.

If the overflow symbol appears, deselect the text frame, select the Selection tool on the Tools panel, and then drag a corner to reshape the text frame.

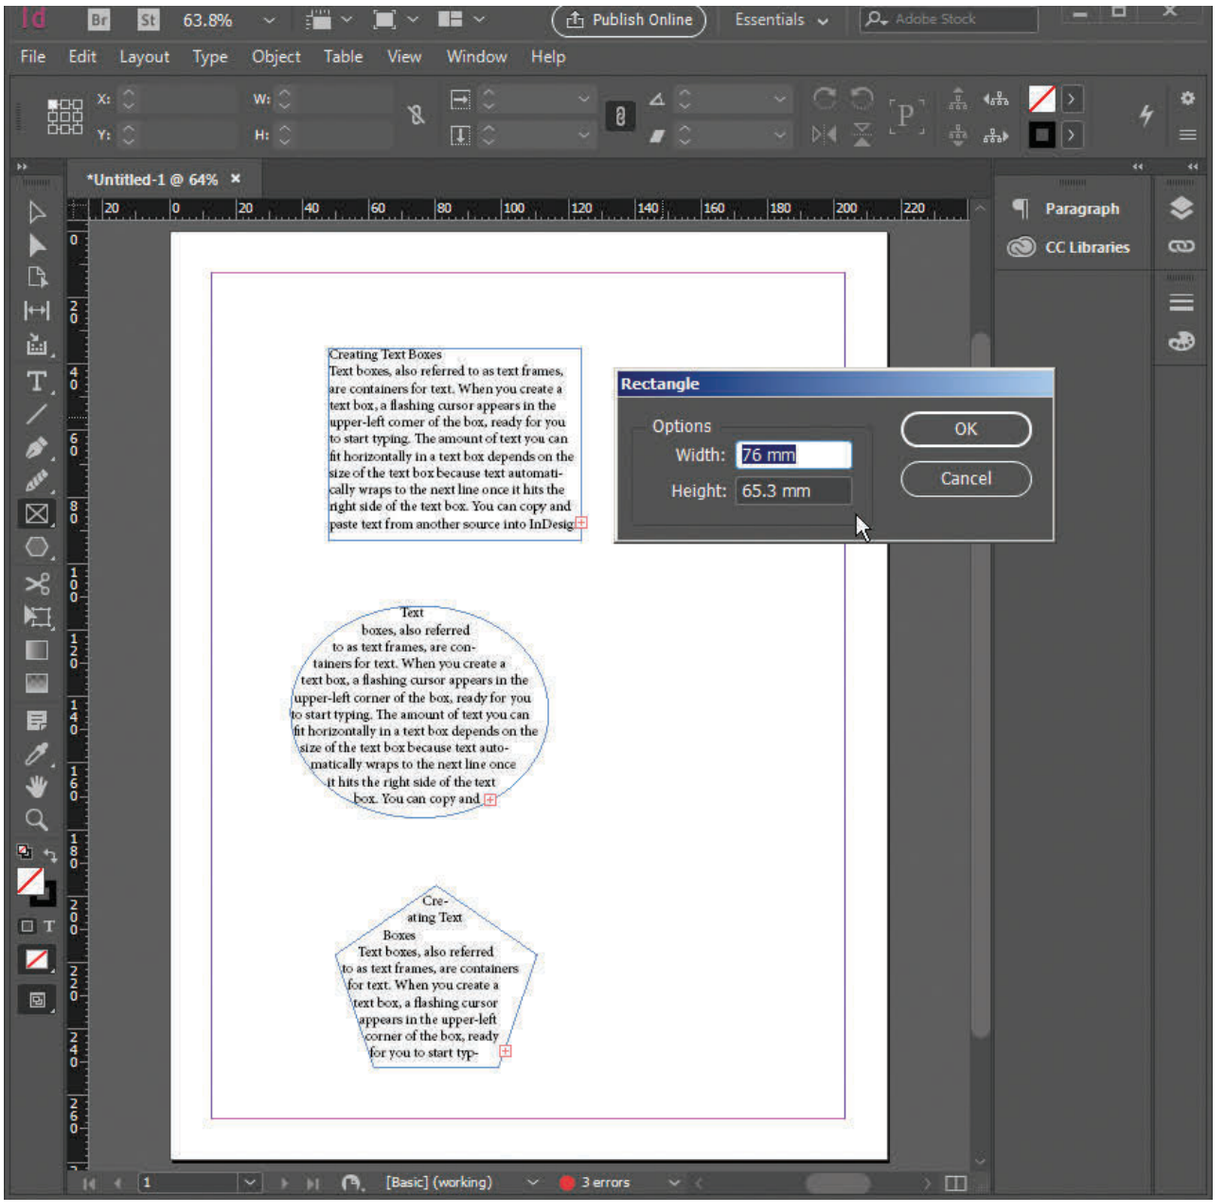

Figure 2. 31 Creating a Rectangle / Elliptical / Polygon Frame for Type

2. 13. 3 Creating Path Type

With the Type on a Path tool, you can add type along the inner or outer edge of a path. You can place the text on either side of the path, but not on both. If you initially place it on the inner part of the path, you can always move it to the outer part of the path later. When you select text on a path, brackets appear that you can drag to adjust the position and placement of the text.
