Create Type on a Path

1. Select the Type on a Path tool on the Tools panel.
2. Click on the edge of the path (closed or open) to which you want to add type.

   A flashing insertion point appears in the text frame. Any fill or stroke on the object is removed.
3. Type some text. The text automatically wraps to the shape of the text frame.

   Don't press **Enter** key.

The type appears along the edge of the object, conforms to its shape, and removes the fill and stroke.

If the overflow symbol appears, deselect the text frame, select the Direct Selection tool on the Tools panel, and then drag a corner to reshape the text frame.

4. Select a Selection tool or select the Type tool again.
