2. 13. 5 Typing and Selecting Text

Before you can work with text in InDesign, you need to select it. You can select the entire text frame or the characters in the text frame. The selection tools (Selection and Direct Selection) allow you to select both characters and its object. You can use the type tools to select only the characters in the text frame, but not the object. When you add text to a text frame, pressing **Enter** key creates a new paragraph. If you want to force a line break, known as a soft return, instead of a new paragraph, you can press **Shift+Enter**.

Making text selections	
To select	**Do the following**
One word	Double-click word
One line	Triple-click any word in the line
One paragraph	Click any word in the paragraph four times
Entire story	Click any word in the story five times
Entire story	Ctrl + A
One character to the right of insertion point	Shift + →
One character to the left of insertion point	Shift + ←
One line up from insertion point	Shift + ↑
One line down from insertion point	Shift + ↓
One word to the right of insertion point	Shift + Ctrl + →
One word to the left of insertion point	Shift + Ctrl + ←
One paragraph above insertion point	Shift + Ctrl + ↑
One paragraph below insertion point	Shift + Ctrl + ↓

2. 13. 6 Changing the Font and Font Size of the Text

You can change the font and font size of the text to enhance the appearance of your document using control palette. When the text is selected, the Control palette displays the character formatting controls.

Changing the Font of the Text

1. Select the text you want to change to a different font.
2. In the Control Palette, click on **Font** drop down list box to display a list of the available fonts.
3. Click on the font you want to use.

   The text you selected changes to the new font.
4. To deselect text, click on outside the selected area.
