9.1 Introduction

The word control is commonly used in practice. You must have come across statements, like control your anger, control your expenses, save money and control your kids. In common parlance, word control means to check or verify, to regulate, to curb or restrain, etc., However, in the context of a business it means a process of controlling the activities of an organisation.

9.2 Meaning

Control is the process through which managers assure that actual activities confirm to planned activities. Control is directly related to planning. The process of controlling ensures that the plans are being implemented properly. In the functions management cycle Planning, Organising, directing and controlling, planning stands primarily before all other functions and controlling as the final function.
