Figure 1.2 Functions of Management

Functions of management are overlapping in nature. Each function affects the performance of other.

1.Planning

It includes determination of objectives, setting rules, procedure, policies, strategies, budgeting etc., Planning may be short term or long term. Manager at all levels want to prepare plans, so it is considered as a pervasive function. Planning looks into future without planning organization cannot achieve anything in future. Planning is deciding in advance what has to done, and how and when it has to be done. It bridges the gap between the present and the future.

Harold Koontz says that planning has the following four important objectives:

1. To offset uncertainty and change,
2. To focus attention of objectives,
3. To gain economical operation, and
4. To facilitate control.

Planning is the basic function of management and all other functions of management are greatly influenced by the planning process. Planning is an inevitable function of management at levels of an organisation.
