alternative, considering the strong and weak points of them and finally identify the most promising one to reach the goal.

5. **Evaluating alternative course of action:** Once the alternative course of actions are identified, the next step is to evaluate the same. Evaluation means studying the merits and demerits of each alternative. Each alternative should be closely studied to determine its suitability.
6. **Choosing the best alternatives:** Once the alternative courses of action have been evaluated the next step is to select the best. The alternative selected should help the organisation in making an optimum use of available resources and help to attain the objective set in the most effective manner.

7. **Formulation of supporting plans:** The main plan should be supported by number of supporting plans to attain the goal. Ex: Once the production plan is ready the supportive plans such as purchase of raw materials, tools, equipments, engaging workers etc, have to be formulated. Without supportive plans it is not possible to carry out the main plan.
8. **Implementation of plans:** Implementation of plan means putting the plans into action so as to achieve the business objectives. After implementation of plans, it is necessary to ensure that the activities of the enterprises proceed in the right direction.

DO YOU KNOW?

The Wright brothers, Orville and Wilbur were two American aviators, engineers, inventors, and aviation pioneers who are generally credited with inventing building and flying the world's first successful airplane. The idea for inventing Aeroplane was developed when they are young. In 1878 their father, who travelled of as a bishop in the church of the united Brethren in Christ, brought home a toy helicopter of his two younger sons. The device was made of paper, bamboo and cork with a rubber band to twirl its rotor. It was about a foot long. Wilbur and Orville played with it until it was broken and then built their own. In later years, they pointed to their experience with the toy as the spark and plan to fly in reality.

2.9 Types of Planning

Planning can be classified into different categories on the following basis.

1. **Nature of Planning:**

   (a) Formal planning

   (b) Informal planning

   Formal planning: Officially recognized planning is known as formal planning. Formal plans are normally in writing. Formal Planning allows to manage the future and improves organisational productivity and increase profitability.

   Informal planning: Informal planning will not be in writing. Informal planning will be effective only when the number of action is less.
