helping to make it better. I also owe thanks to Priyal, who took my drab blocks of text and transformed them into colourful, interesting pages punctuated with photographs and vivid illustrations.

To the many people who patiently looked over my lists of names, read drafts, made insightful comments, gave me reading recommendations and pointed out errors, both large and small—you should know I couldn't have done this without your help. I am especially grateful to Shalini Agrawal, who proofread the entire book and provided valuable feedback.

I am also grateful to the many historians and biographers who have written on modern India. Reading their work helped me discover just how complex and interesting modern Indian history can be.

And finally, to my mum, grandma, and brother, my friends and my partner, who have all had to compete with India's makers for my attention over the last two years: thank you for listening to all my stories.

**Ashwitha Jayakumar**

*To better reflect the lived reality of the people in the book, I have largely used the names of Indian cities and states as they would have known them. Where appropriate, present-day names are given in parentheses, and occasional use is made of present-day names for the sake of convenience where space is scarce.*
