

The Renkoji temple in Tokyo is believed to be the final resting place of Bose’s ashes.

A tragic end

When Bose’s allies were defeated in World War II, he decided to travel to the Soviet Union (now Russia) for aid. Tragically, the plane he was on crashed in Taiwan. Not even fifty years old, Bose died, his dream of seeing an independent India unrealized. People refused to believe that a fearless and dynamic leader like Bose could have met such an untimely end. Rumours about his survival continued for decades, a testament to his enduring popularity. According to both the Indian and Japanese governments, none of these have any truth to them.
