disappointed when the secret Sykes-Picot wartime agreements, made by by the victorious Anglo-French allies to despoil the Ottoman Empire, came to light. The popular pan-Islamic Khilafat Movement was most strongly supported by Mahatma Gandhi as the first plank of his postwar Satyagraha (Hold Fast to the Truth) noncooperation movement against British duplicity and tyranny in 1919. That movement collapsed, however, when Mustafa Kemal Atatürk, the first president of the Turkish Republic, abolished the Caliphate. Gandhi meanwhile had turned to more revolutionary action against the Raj, calling upon his followers in 1920 to launch a multiple boycott of all things British, including law courts, titles, and Western education. British imports of every variety, especially cotton clothing and silk dresses, were burned in huge open-air fires, redolent of ancient Vedic sacrifices. Jinnah opposed such mass protests, fearing that they would provoke violence, despite Gandhi's insistence that nonviolence *(a-himsa)* must be central to his movement, considering it no less than God, even as he valued truth *(satya)*, the ancient *Rig Veda's* term for the real.

Jinnah's objections were ignored by Gandhi's Indian National Congress, however, and he was shouted down by its vast majority, who considered him a Muslim tool of the British and drove him out of its meeting, and out of politics entirely. He rented law offices in London, pleading appeals before the Privy Council, living in a splendid house in Hampstead near the Heath, until several of his closest Bombay Muslim friends invited him to lead their moribund Muslim League, which Jinnah quickly revitalized, becoming its permanent president. Mahatma Gandhi and Motilal Nehru then led the Congress party.

In 1930, Motilal's only son, Jawaharlal, presided over the first of his many annual Congress sessions, drafting its passionate demand for complete freedom *(purna swaraj)* from British rule. The radical, charismatic Nehru led the Congress party to victory in every electoral campaign he undertook. He was not only Gandhi's political heir, but also the darling of India's intellectuals. Men and women alike were drawn to join the Congress thanks to his idealism and personal magnetism. Ardent socialist that he was, Nehru considered Jinnah a reactionary reflection of the outmoded English liberalism of the previous century, and never took him or his League seriously as a challenge to Congress dominance. When Congress won the majority in most provinces of British India in nationwide elections of 1937 and Jinnah called for coalition Congress-League cabinets in the largest multicultural provinces of North India,
