Again the student of the Nyaya Shastra cannot be said to have improved his mind after he has learned from it into how many ideal classes the objects in the Universe are divided, and what speculative relation the Soul bears to the body, the body to the Soul, the eye to the ear, etc.

In order to enable your Lordship to appreciate the utility of encouraging such imaginary learning as above characterised, I beg your Lordship will be pleased to compare the state of science and literature in Europe before the time of Lord Bacon, with the progress of knowledge made since he wrote.

If it had been intended to keep the British nation in ignorance of real knowledge the Baconian philosophy would not have been allowed to displace the system of the schoolmen, which was the beat calculated to perpetuate ignorance. In the same manner the Sangscrit system of education would be the best calculated to keep this country in darkness, if such had been the policy of the British Legislature.

But as the improvement of the native population is the object of the Government, it will consequently promote a more liberal and enlightened system of instruction, embracing mathematics, natural philosophy, chemistry and anatomy, with other useful sciences which may be accomplished with the sum proposed by employing a few gentlemen of talents and learning educated in Europe, and providing a college furnished with the necessary books, instruments and other apparatus.

In representing this subject to your Lordship I conceive myself discharging a solemn duty which I owe to my countrymen and also to that enlightened Sovereign and Legislature which have extended their benevolent cares to this distant land actuated by a desire to improve its inhabitants and I therefore humbly trust you will excuse the liberty I have taken in thus expressing my sentiments to your Lordship.

I have, etc.,

RAMMOHUN ROY.

Calcutta;

The 11th December 1823 [emphases added].

This letter tells us quite a few things about Raja Rammohun Roy as well as about the two-way nature of coloniality as observed by Dr. Balagangadhara.
