these years.’ As part of its expansion strategy, he announced that TCS would ‘spend Rs 1,000 crore towards real estate development’, which included establishing campuses all over the country and Rs 300 crore for ‘technological expansions’. He also announced that the company ‘would continue to grow around 28–30 per cent during the year’.

In the following years, the company bagged some large overseas contracts, such as a Rs 4,740 crore or $1.2 billion order from Nielsen Co., a Netherlands-based information and audience measurement firm, to manage its finances and networks. It was the largest outsourcing deal involving an Indian IT firm. Simultaneously, it moved rapidly to grow through acquisitions. In 2008 it acquired Citigroup Global Services Limited, the back-office operations of Citigroup Inc. in India. In a landmark deal, the company also signed a Rs 10 billion agreement with the Indian Ministry of External Affairs for the Passport Automation Project. TCS has since then ‘opened and managed 77 Passport Seva Kendras across India’.

In 2009, TCS became a $6 billion company in revenue and a top ten player in the global IT software and services industry, a year before its target date. Its footprint had ‘extended to over 42 countries through its 140 offices globally’. For FY 2009–10, it reported an NPAT of Rs 4696.21 crore.

In 2010, at the AGM, Ratan highlighted his aim to ensure that TCS maintained its ‘market share’. In 2010, the company’s increasing global reputation helped it bag a prestigious contract with the British government to administer the National Employment Savings Trust (NEST), becoming the ‘second-largest player in the UK life and pensions third-party administration market’.

At the company’s AGM in 2011, Ratan announced a capex of Rs 2,300 crore to build facilities for its fast expanding business. He declared that the focus of the company would now be to enter new markets in Europe and other geographies and on ‘growing retail and high technology verticals in the current year. We will continue to see [the] current growth level’. He emphasized the need to secure ‘anchor clients’. In the following year TCS did so, bagging a prestigious multi-year, multi-million pound contract from the Home Office of the UK government for the implementation of their newly formed disclosure and barring services (DBS).

Under Ratan’s leadership, TCS became the group’s most profitable company, achieving the $10 billion mark in revenue for FY 2012–13. The
