

CHAPTER 27

CBI TEARS INTO KERALA POLICE, IB

'Incoherent and full of contradictions.'

The CBI's investigation report filed before the CJM, Ernakulam on 28 April 1996 demolished the spy theory. But what made it more attractive to me was that it gave a clear picture of the theory itself. While being in the custody of IB, my tormentors' questions and actions had moved me between surprise and suspicion, but now this the 104-page document gave me the story according to them—and helped me fill in the gaps in my theory of an international conspiracy to stall India's advance in space.

The CBI report said:
'Though no independent evidence has come on record during the course of local police/crime branch investigation about the alleged espionage activities of the accused persons, yet based on the revelations allegedly made by the accused, the module that emerged regarding the espionage activities was that accused Nambi Narayanan and Sasikumaran used to pass on documents/ drawings of ISRO relating to Viking/Vikas engine technology, cryogenic engine technology and PSLV flight data/drawings, and accused Chandrasekhar, S K Sharma and Ramana Srivastava, the then IGP South Zone, Kerala, passed on secrets of Aeronautical Defence Establishments, Bangalore.
