12.4.4 Spreading, Marker Planning and Cutting Department

Approved sample, pattern and measurement chart must be ready in the department. The head of the department will be a pattern master. His skill will be a very big asset to the company by way of saving the fabric and making new designs for the export trade.

Machinery required: one cutting machine. One table of 18 m/1.5m length and breadth

Spreading

In the cutting department, spreading plays a vital role. In spreading, the number of plies of fabric, that the production planning process has dictated to the length of the marker plan, colours required are correctly aligned as to length and width, and without tension. This saves time, cost of cutting and cost of materials.

Marker Planning

The amount of fabric consumed per garment and the total profit of the garment unit is decided by the marker planning and marker making. The length and width of the marker is very important here. Based on this marker only the spreading length will be decided. The fabric consumptions and fabric wastages depends on this marker making. The industry has always paid great attention to marker planning, because when the cutting room cuts cloth it spends around half the company's turnover. Any reduction in the amount of cloth used per garment leads to increased profit.

12.4.5 Sewing

Power operated machines preferably batch system is used to get uniform quality and better productivity. Production in charge will be responsible for the sewing operation. He must know quality aspects in every stage, guide tailors and supervisors to get the work done at satisfactory level and to meet the targets. Additional to sewing machines, attachments, guides, folders are required for special operations. Machines like Double needle, Feed of arm, Button Hole and Buttoning machines are also required.

12.4.6 Washing Department

Either for effects or shrinkage garments are washed. Washes vary depending upon the type of fabric used and the type of garment. Some of the common washes are garment wash, stone wash, caustic wash, bleaching acid wash, sand wash and enzyme wash.

Machinery required : Washing machine, Hydro Extractor, Tumbler Drier, Store/ Chemicals

12.4.7 Quality Control

Quality is an important concept in all stages of garment production. To get the quality product, check and controls must be ensured in each stage of the production. This will also avoid all kinds of mistakes.

Prevention is better than cure and also do the things right at the first time. These will really bring an awareness in the production line. By any chance an alteration or a mistake in the garment is difficult to be rectified properly. For upkeep of quality, good housekeeping and cleanliness should be of top priority.

12.4.8 Pressing and Folding

Presentation of a packed garment makes all the difference in sales. The real skill
