GLOSSARY

Embossing	Alters the surface of the fabric by providing a three dimensional or raised effect on selected areas
Shearing	A process that evens out the length of the pile of a fabric
Singeing	Removal of surface fibres by an intensive flame or by reflected heat
Mercerization	A finishing process to increase lustre of Cotton fibres
Heat setting	One of the functional finishes which is carried out mainly on synthetic fabrics.
Water proof finishes	A finish which gives the resistance of water to the fabric
Moth proof finishes	A finish to prevent the growth of moths

QUESTIONS AND ANSWERS

4ZWER1

PART – I
Objective Questions

1. To produce a smooth surface finish on fabrics_____ process is done
   (a) Starching
   (b) Singeing
   (c) Embossing
   (d) Heat Setting
2. The term_____ is used to describe shrink proofing processes.
   (a) Sanforizing
   (b) Singeing
   (c) Calendaring
   (d) Napping
3. The most common chemical used for imparting anti-microbial finish is_____.
   (a) Gelatin
   (b) Ziconium Peroxide
   (c) Thermasol
   (d) Polyurethane
