

CHAPTER 5

Selection of Clothing and Clothing Care

AY7U3Y

LEARNING OBJECTIVES

- **To learn about the method of selecting clothing and its care.**
- **To understand the types of clothing care methods.**

5.1 Introduction

Clothing protects the human body from extreme weather and other features of the environment. The practical function of clothing is to protect the human body from environmental hazards such as weather, insects, toxic chemicals, weapons and other hazards.

5.1.1 Factors Affecting Clothing Selection

The clothes that you choose to buy and wear are influenced by several factors such as age, climate, occasion, income and occupation.

- **Climatic Factors**

People living in cold climate need to wear woollen clothes to keep warm. People living in very hot climates as in desserts need to wear turbans of thick cloth to protect their heads and wear garments made of cotton to stay cool.

- **Occasion**

Bright coloured garments are worn during marriage functions for eg., lehanga cholis, ghagras and shararas often accompanied by bright accessories. Simple clothing with minimum accessories like a formal salwar kameez will give a more professional look for an interview. Sari, formal trousers shirt, tie would be a good option for the wearer to feel active and confident.

- **Age**

Clothes worn by an adult woman are definitely not the same as those worn by a college going girl. For small children dainty prints in soft colours can be chosen. When children enter late childhood stage, boys like masculine colours like blue, greyish blue and brown and girls like to wear feminine colours like pink, green, red etc. Teenagers like to have variety in their clothes. Selection of clothes for adults depends upon the type of work a person is engaged.
